

Statement of Intent:

The intention for this faire is:

To provide a central venue for networking and getting to know the different local alternative practitioners, therapies and wellness products that are available to aid us in experiencing wholeness of being - physically, emotionally, mentally, and spiritually.
To educate and create greater awareness of the increasingly varied multitude of choices of less invasive, holistic health methods.
To empower ourselves and others by regaining and maintaining our health with new (and old) information, right choices, positive thinking and lifestyle changes - all while avoiding surgery or the use of drugs, if begun soon enough.

Consider that:

Our bodies do not become sick because of lack of drugs.
All drugs, whether legal or illegal, block the symptoms and cause side/unwanted effects.
Medicine does not have to taste bad or produce detrimental side effects.
Organs do not have to be removed.
Dis-eases do not have to kill.
Only if we let them.
